Add dosage per 1 litre of tap or rainwater.

1. Fill your watering can halfway with tap or rainwater.
2. Add the desired amount of fertiliser.
3. Fill up the rest of the watering can with tap or rainwater.
4. Your solution is now ready to use!

All stated doses are indications and depend on type of plant, plant conditions, environment and light intensity.
Less suitable for irrigation systems, can cause odors & biofilm.
